1 l PE-bottle (colorless)	3379	10	360
10 l PE-canister (colorless)	3380	-	60

Properties: Fona Speed is based in a special organic acid. Typical soilings in bathroom and sanitary areas like lime residues or lime spots, urine stone or lime soaps are eliminated extremely strong and quick. Oil and grease residues are also removed. Fona Speed is very fast working and shows very good material compatibility at the same time because of additional corrosion protection. Fona Speed is also available in a 500 ml spray bottle with foam function. Suitable for processing by using a foam gun. Fona Speed is RK listed.

Field of Application: Suitable for all acid resistant and waterproof surfaces in bathroom and sanitary areas, like porcelain stoneware, tiles, WC-bowls, urinals, washing tables, sanitary ceramics, stainless steel, chrome-plated fittings etc.

Application: apply cleaning solution, leave for a short time, wipe and flush with clear water. Fona Speed is suitable for use in the foam gun. Fona Speed in 500 ml spray-bottle is ready-to-use and for suitable manual foaming. For maintenance cleaning Fona Speed is foamed by using the foam /spray pistol. After a short time wipe with sponge or cloth and flush with clear water.

Dosage: 20 – 30 ml to 8 l water for maintenance cleaning. Depending on soiling choose a higher dosage up to undiluted usage respectively.

Ingredients: <5% nonionic surfactants, perfumes. Other ingredients: organic acid, corrosion inhibitors.

Note: Always pre-moisten joints thoroughly before application. Do not use on materials that are not acid-resistant, such as marble, limestone, cement bound cast stone, zinc or brass. Caution, do not mix with agents that contain chlorine as this releases toxic chlorine gas. Free of inorganic acids.

Productcode: GS 80

This product is intended for commercial use only. Safety data sheet available on request or at www.fala.de. For safety instructions pay attention to product label or safety data sheet.
